ABOUT US

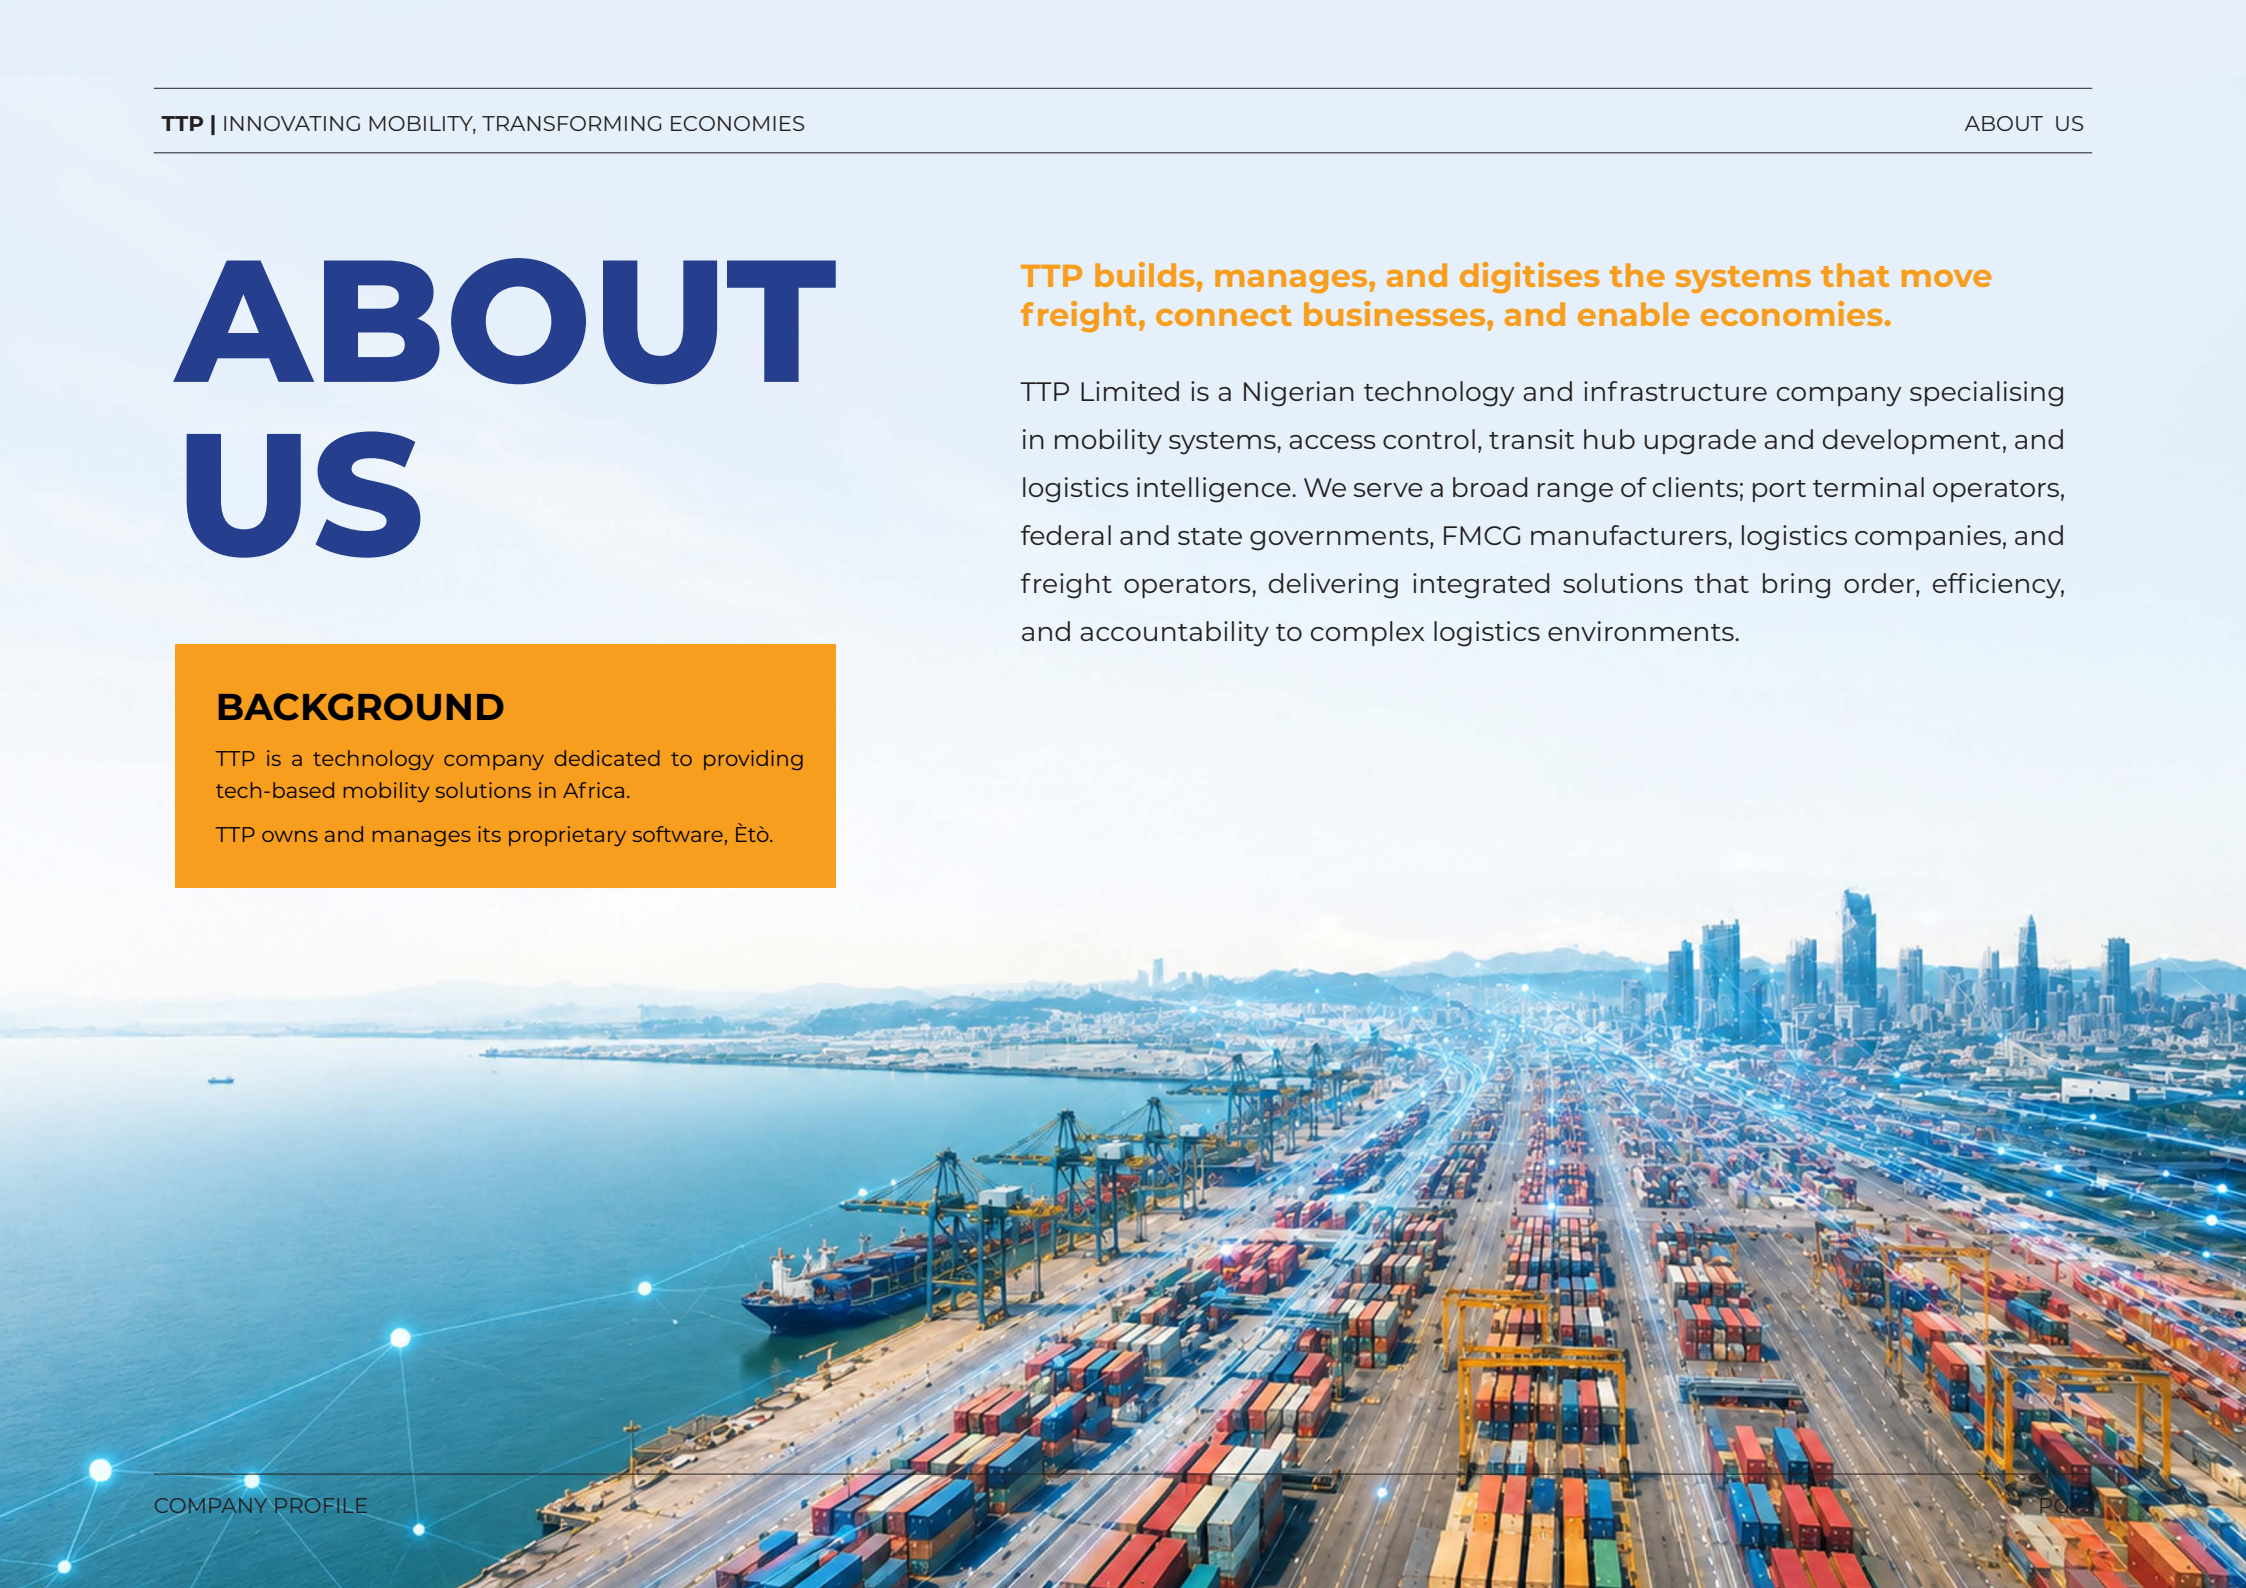

BACKGROUND

TTP is a technology company dedicated to providing tech-based mobility solutions in Africa.

TTP owns and manages its proprietary software, Ètò.

TTP builds, manages, and digitises the systems that move freight, connect businesses, and enable economies.

TTP Limited is a Nigerian technology and infrastructure company specialising in mobility systems, access control, transit hub upgrade and development, and logistics intelligence. We serve a broad range of clients; port terminal operators, federal and state governments, FMCG manufacturers, logistics companies, and freight operators, delivering integrated solutions that bring order, efficiency, and accountability to complex logistics environments.

Intelligent Mobility Infrastructure Company

Innovating Mobility, Transforming Economies

TTP powers the movement of Nigeria's economy by designing and managing the infrastructure that keeps freight, industry, and commerce flowing at scale.

History

Founded in 2017, TTP Limited was established to address the growing challenges of mobility and logistics management in Nigeria. Following recognition under the Federal Government's Economic Recovery and Growth Plan in 2018, TTP was selected by the Nigerian Ports Authority as its preferred partner for the management of the Lagos ports traffic in 2020.

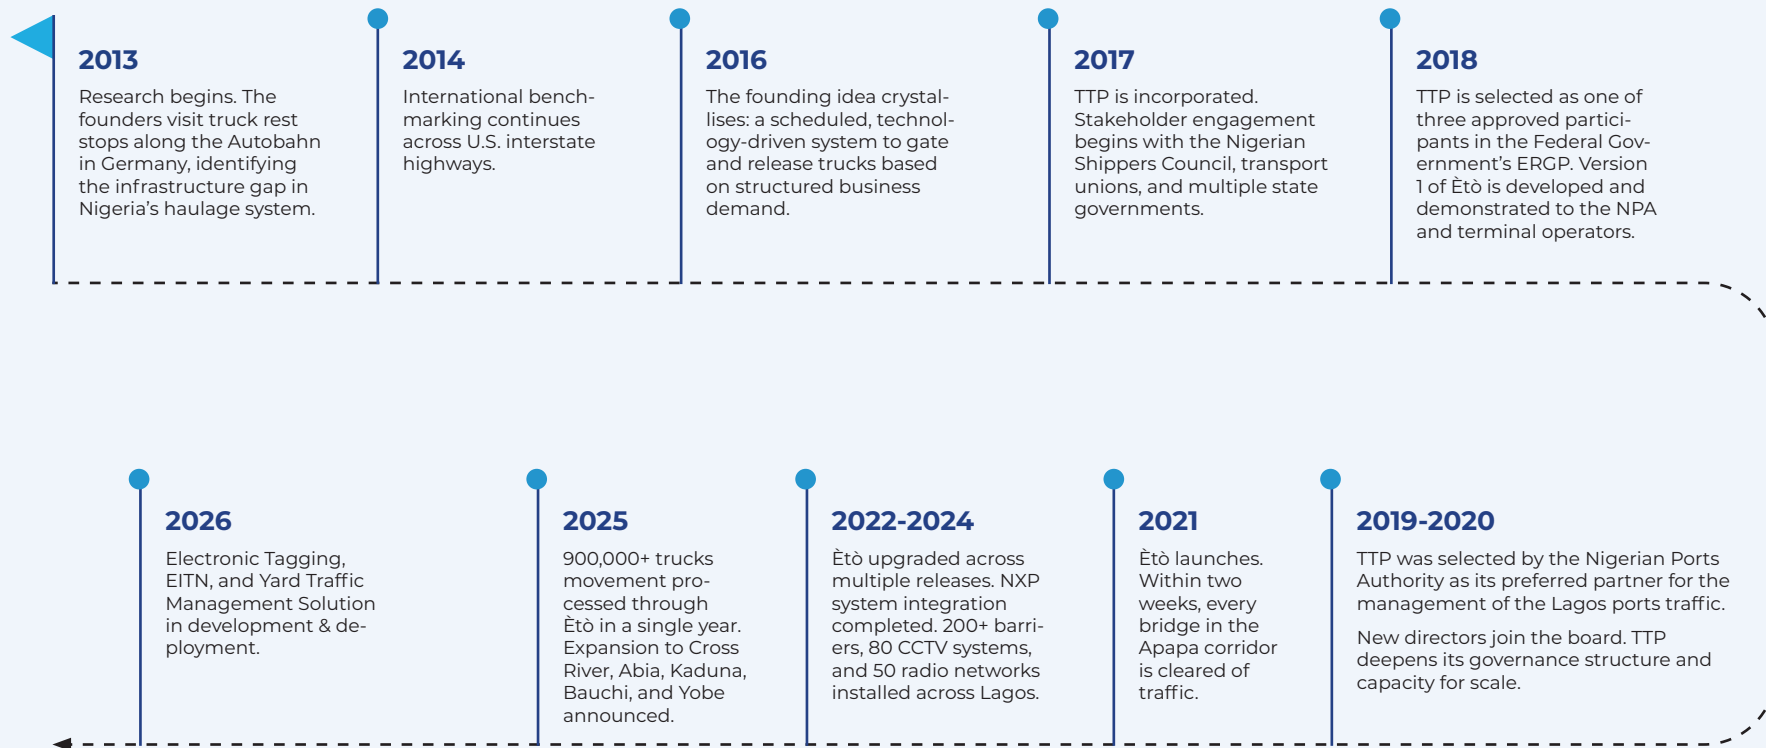

In 2021, TTP launched Ètò, Nigeria's pioneering electronic truck call-up system, transforming truck movement within the Apapa port corridor and significantly reducing congestion around the nation's busiest ports. Since then, the company has expanded its operations across mobility infrastructure, access control, logistics intelligence, and transit management, serving ports, manufacturers, logistics operators, and government institutions across Nigeria while driving expansion into new markets and regions.

Journey & Milestones Timeline

From Research to Reform: The TTP Story

What began as a research project into Nigeria's truck parking crisis has grown into the country's leading mobility infrastructure company, serving ports, governments, manufacturers, and freight operators across Nigeria.

Track Record

A Proven Platform, Ready to Scale

Since 2021, TTP's Ètò electronic call-up platform has been the live, traffic management of the Apapa port corridor, the operating proof that now underwrites this national expansion.

100+ Facilities

Digital management of Lilypond trailer park and 100+ facilities across Lagos and Ogun State.

3.8M+

Truck movements processed on the Ètò intelligent mobility system in 60+ months.

100%

Ètò uptime maintained since launch.

65%

Reduction in the cost of moving cargo compared to logistics costs before 2021.

2 - 3 Days

Reduced port-bound truck turnaround from 2-3 weeks down to just 2-3 days.

\$1.7B

Annual savings for the Nigerian maritime industry following the introduction of Ètò callup.

OUR DIRECTORS AND MANAGEMENT TEAM

Directors

- Jama Onwubuariri
- Ivory Jacobs
- Ben Unaegbunam
- Efeoghenekome Emuemukoro

Managements

- Richard Emenim
- Obinna Nwaogu
- Jennifer Imarhia
- Irabor Akonoman
- Olufemi Olowokere
- Olaoluwa Olorunda

JAMA ONWUBUARIRI

Co-Founder & MD

Jama Onwubuariri is a visionary problem-solver, renowned for his multifaceted expertise. He is the Co-Founder and CEO of TTP Ltd; a tech mobility company focused on intelligent mobility infrastructure in Africa.

Jama is an experienced legal practitioner, an astute tech enthusiast, a dedicated community volunteer, and an innovator. His commitment to sustainable energy solutions led him to co-found Renenergetics Integrated Solutions Ltd, dedicated to sustainable energy solutions for residential and industrial users.

Furthermore, Jama co-founded B&D Tech Ltd, a company specializing in bespoke tech and fintech solutions for merchants and businesses. This innovative firm has been entrusted by a coalition of agro-export practitioners to build a comprehensive one-stop shop for tracking, certifying, monitoring, and transporting agro-exports for international markets.

Jama's additional experience - OES Energy Services Limited: Head Legal & Compliance/Company Secretary, Oando PLC: Legal Advisor, and ACAS-Law (now Dentons-ACAS): Associate, Energy & Projects Finance.

Jama is fluent in English, French, and Igbo and is an American Sign Language instructor.

Jama Onwubuariri's remarkable journey as a trailblazer in both the legal and tech fields makes him a driving force in shaping transformative solutions for the mobility and energy sectors in Nigeria and beyond.

IVORY JACOBS

Co-Founder & Director

Ivory Jacobs is a versatile professional with a diverse skill set spanning human and material resources management, human resources development, business strategy development, life coaching, French language and translation instruction, and interior and fashion design.

Ivory brings a rare breadth of expertise to her role as Non-Executive Director at TTP Limited, spanning administration, human and material resources management, business strategy, and facility management.

Her career reflects a talent for building and running systems that work. She previously served as Head of Administration, and remains a Partner at Bespoke Dupont properties & Facilities. Ivory is an education professional with certifications from both anglophone and francophone countries. Her interests also spans into life coaching.

Over the course of her career, Ivory has led administrative operations at director level, overseeing organizational systems and driving operational efficiency within a busy logistics and transit environment. She has also built a long-standing partnership in property and facilities management, where she has honed her expertise in facility oversight, client relations, and space design. Earlier in her career, she developed a strong foundation in education, teaching American Sign Language as a volunteer and subsequently, French language at both secondary and university levels, an experience that sharpened her communication, instructional, and cross-demographic skills.

With her combined expertise in facility management, interior design, and education, Ivory brings a unique, multidimensional perspective to her work. Her diverse background enables her to manage complex operations, anticipate and meet client expectations, and deliver value across multiple domains, making her a truly invaluable asset in the board of TTP.

**BEN
UNAEGBUNAM**

Director

Ben Unaegbunam is a Partner at Dentons ACAS-Law's Lagos office, where he specializes in Corporate and Commercial law. With extensive experience in infrastructure transactions, mergers and acquisitions, and property law, Ben is a highly regarded legal professional with a diverse range of expertise.

His key focus areas include taxation, employment, fintech, and security issues related to project and infrastructure finance transactions. Ben has provided invaluable advice to numerous clients on tax matters and has offered legal opinions on various company law issues.

In addition to his involvement in the Federal Government of Nigeria's privatisation drive, Ben has a strong background in advising on infrastructure concession projects. He guides clients through obtaining all necessary consents and permits while ensuring compliance with relevant laws and regulations.

Ben's remarkable achievements and experience include - Advised the management of Interswitch on VISA's acquisition of a 20% stake in Interswitch for US\$200 million; Provided counsel to the Public Investment Corporation of South Africa (PIC) on its US\$250 million equity investment in Ecobank Transnational Incorporated (ETI), including extensive due diligence on Ecobank Nigeria Plc and Oceanic Bank Plc; Played a significant role in the successful privatization bid and US\$2 billion concessioning of the container terminal at Apapa Port, Nigeria, for AP Moller-Maersk.

Furthermore, he was acknowledged as highly regarded in Project development, Capital markets: Structured finance and securitization, and M&A practice areas for 2019, 2020, 2021, and 2022 by IFLR 1000.

Ben is a member and affiliate Fellow of the Chartered Institute of Taxation of Nigeria; Member of the Nigeria Bar Association; Member of the International Bar Association; Member of the Chartered Institute of Taxation.

**EFOGHENEKOME
EMUEMUKORO**

Director

Efeoghenekome Emuemukoro is a seasoned business executive, entrepreneur, and energy industry professional with nearly three decades of experience spanning operations management, drilling services, energy solutions, and business leadership. He has successfully built, managed, and scaled businesses within Nigeria's energy and industrial services sectors, demonstrating strong expertise in strategic planning, operational excellence, stakeholder management, and organizational leadership.

Mr Emuemukoro currently serves as a Director at TTP Limited, bringing executive oversight, strategic direction, and commercial leadership to the organization. He also co-founded and has led Transcontinental Integrated Services Limited since 2006, driving business growth and client engagement across the energy and industrial services landscape.

His career progression reflects a strong operational foundation, beginning as a Field Geologist, advancing through Operations Management roles in drilling services organizations, and culminating in executive and board-level leadership positions. This broad experience provides him with a unique combination of technical understanding, commercial acumen, and strategic leadership.

RICHARD EMENIM

Chief Strategy & Commercial
Officer

Richard Emenim is a corporate finance and infrastructure development executive with over 15 years of experience spanning banking, consulting, logistics, and technology-enabled infrastructure platforms. He currently leads Strategy & Commercial at TTP Limited, where he drives business and project execution, financial planning, capital and commercial structuring, and investor engagement for large-scale Public–Private Partnership (PPP) infrastructure projects across Nigeria.

Richard has led financial modelling and investment structuring for TTP's nationwide transit hub development programme valued at over ₦100 billion, engaging commercial banks and Development Finance Institutions to mobilize long-term infrastructure financing.

His expertise spans project finance, investment analysis, financial modelling, valuation, financial reporting, business analysis and control. Previously, he led financial reporting and strategic performance management for Bollore Transport & Logistics Nigeria, overseeing financial planning for entities generating over \$100 million in annual revenue.

A First-Class Accounting graduate, ACCA member, and MBA holder, Richard combines deep financial expertise with strategic insight, delivering investor-ready financial frameworks and bankable infrastructure investment opportunities.

**OBINNA
NWAOGU**

Chief Operations Officer

Prior to joining TTP as its Chief Operations Officer, Obinna was the Country Head for Treepz Inc. – a traveltech company operating in Nigeria, Ghana, Kenya & Uganda. He directly oversaw operations, strategy and business development, leading to the evolution of Treepz’s services as the largest transport marketplace in Africa.

Obinna has many years of experience in project management, business and strategy development across a wide range of sectors within and outside Nigeria. Before joining Treepz, he successfully coordinated the deployment of the first Automated Fare Collection (AFC) system for the Nigerian Railway Corporation. This resulted in a 65% revenue rise for the federal government from the Abuja – Kaduna rail line in the first year. A combination of his engineering background and business knowledge from the Norwich Business School, UK, provides a comfortable foundation to understand and relate with both technical and commercial organisations in a bid to proffer solutions.

While at Norwich Business School (NBS), he efficiently led a multi-cultural team in a strategy simulation event where they successfully re-strategised, re-branded and re-launched a product that had initially failed in the UK market but was booming in the Dutch market. He then spent a couple of years as a business development executive in England, where he realigned an organisation’s strategy, resulting in 24% revenue growth. He has experience in various assignments involving commercial negotiation, business process re-improvement, strategy development, and project management.

He is a Fellow of the Chartered Institute of Logistics & Transport, a Fellow of the Nigerian Society of Engineers, a certified Project Management Professional (PMP) and a Certified Management Consultant (CMC).

**JENNIFER
IMARHIA**

Chief People Officer

Jennifer Imarhia is currently the Chief People Officer at TTP Limited.

Jennifer is a Certified CIPM Professional with an MBA in Human Resources Management, with over 16 years of experience in Human Resources and General Administrative Management. Mrs. Imarhia started her career in 2007 as an Admin Officer in an Engineering firm, Vision Quest.

A few years later, she moved on to a Management Consulting firm, Abraham Holmes Limited, where she grew to become Head, Project Leader, Outsourcing unit.

In 2009, Mrs Imarhia joined the Silverbird Group of Companies as an Organizational Development specialist, where she rose to become the Group Head, Human Resources, Silverbird Group. In 2013, she joined Nigeria's foremost private Security Solutions company, Vanni International Security Systems Limited, as Head, Human Resources & Admin.

Four years later, Jennifer joined the Lagos Bus Services Limited (LBSL), where she worked as Head, Human Resources and Administration.

IRABOR AKONOMAN

Head of Infrastructure
Business

Irabor Akonoman is the Head of Infrastructure at TTP Ltd and was employed as ICT and infrastructure manager in TTP before joining the operations department. He is a certified data privacy solutions engineer with over 20 years of experience as a network and cyber-security consultant.

He has consulted for private and public institutions in Nigeria and different parts of the World.

His previous experiences include Head of Security Integration and Services, where he supervised different teams assessing risks and deploying mitigating solutions for financial institutions for PCI-DSS certifications.

He has designed and implemented network architecture and recommended actions to reduce the risk to confidential data for some of the largest corporations in Nigeria such as MTN, Glo, Nigeria Stock Exchange, CBN, Etisalat, 9mobile, Africa-re, and Vodacom.

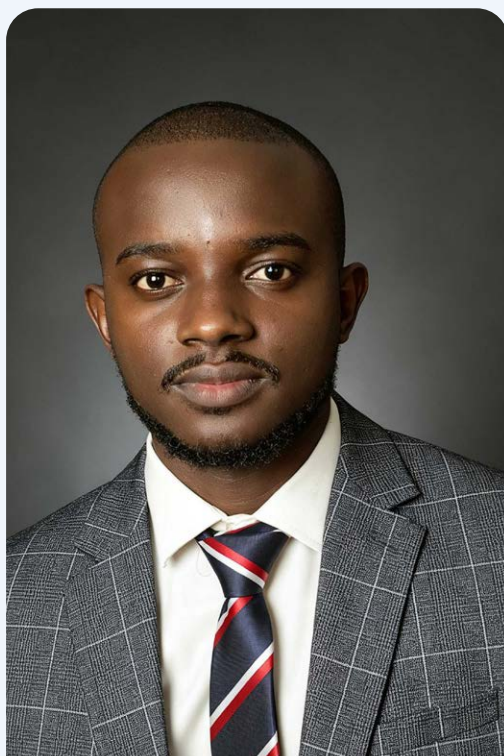

OLUFEMI LOWOKERE

Chief Financial Officer

Olowookere Olufemi Joshua is a seasoned finance professional with over 16 years of post-qualification experience spanning transport management, civil engineering, marine and oil & gas, and investment banking. A Fellow Chartered Accountant and MBA holder, he currently serves as Chief Financial Officer at TTP Limited, a tech firm revolutionizing truck mobility across Africa.

Femi has a proven track record in financial strategy, budgeting, performance management, corporate finance, and business reorganization. His career highlights include leading multi-billion-Naira loan restructurings, driving operational cost reductions, and supporting private equity investments. He has held senior finance roles at Cardinal Stone Capital Advisers, OMSA Integrated Services, and Beco Petroleum Products, where he consistently delivered value through financial planning, ERP implementations, and strategic advisory.

He is proficient in a wide range of financial systems, including Sage Pastel, Sun Business, Dynamics GP, and Vision, and is bilingual in English and Yoruba. Known for his analytical acumen, leadership, and strategic thinking, Femi is committed to excellence and impactful financial decision-making.

**OLAOLUWA
OLORUNDA**

Head, ICT

Olaoluwa Taiwo Olorunda currently serves as the Head, ICT at TTP Ltd

Olorunda Taiwo Olaoluwa is a Software Application Developer with over 10 years of experience building secure, scalable, and high-performance digital solutions across the Logistics, Oil & Gas, FMCG, and Fintech sectors.

He specializes in enterprise application development using Laravel, PHP, and VueJS, with strong expertise in IoT systems integration and business process automation.

He has led the development of mission-critical platforms, including HR and fintech automation systems, enterprise recruitment portals, IoT-enabled access and traffic management solutions, and business intelligence dashboards that significantly improved operational efficiency and decision-making.

Olaoluwa also has experience in ERP implementation, enterprise systems integration, and data analytics, helping organizations optimize operations and drive revenue growth. He holds a B.Sc. in Computer Science and is currently completing an MBA with a specialization in IoT and Cybersecurity, enabling him to bridge advanced technology with strategic business outcomes.

WHO WE ARE

We are a technology and infrastructure company that develops and manages mobility, logistics, and access control solutions that improve the movement of people, goods, and economic activity.

Our Vision

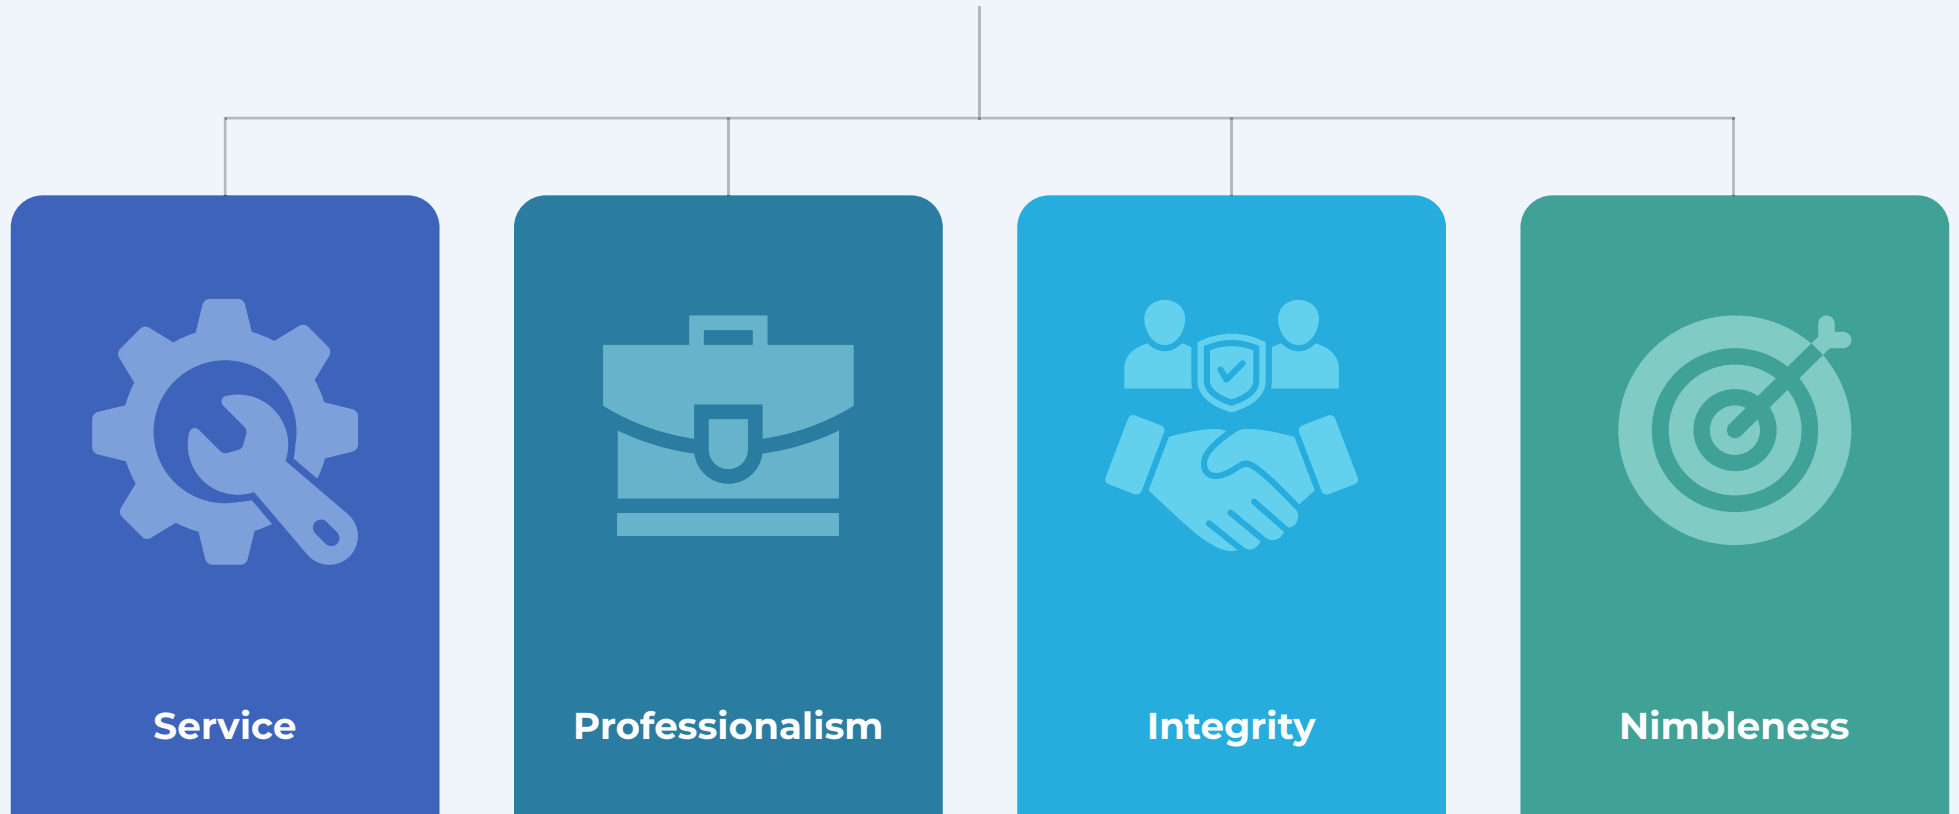

To define the standard for intelligent mobility infrastructure across Africa.

Our Mission

To design, deploy, and manage world-class intelligent mobility infrastructure solutions that bring order to complex logistics environments, creating measurable value for clients, operators, governments, and for the communities where we operate.

CORE VALUES

Our DNA is **S.P.I.N**

WHAT WE DO

- Truck Call-Up & Traffic Management
- Access Control & Monitoring
- Truck Park & Transit Hub Development
- Vehicle Scheduling & Transit Management System (VSTMS)
- Mobility Consulting & Design
- SaaS for Car & Trailer Parks

Truck Call-Up & Traffic Management

TTP's electronic truck call-up platform, Ètò, schedules and sequences freight truck movement across ports, terminals, parks, and private facilities, replacing unstructured access with a coordinated, data-driven system that keeps corridors clear and cargo moving.

Ètò Architecture

- Electronic booking, ticketing, and payment via mobile and web
- Significant reductions in truck turnaround and cargo dwell times, logistics costs, and cargo evacuation delays.
- Live operational dashboards for operators, regulators, and freight stakeholders

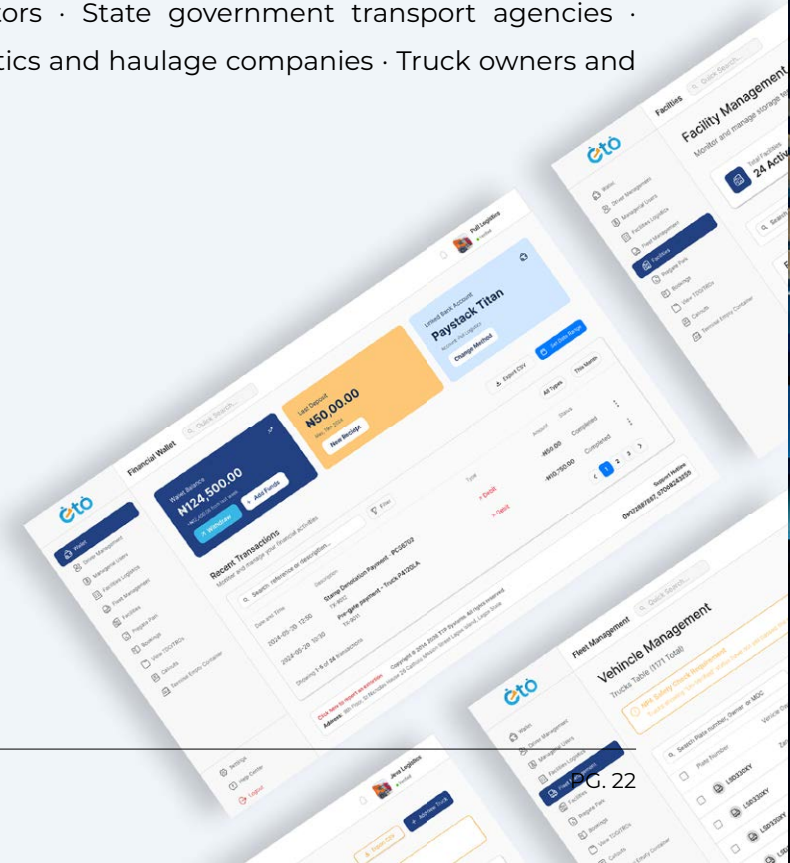

Medium to Long Term Impact

- Elimination of unstructured queuing and road congestion

- Real-time truck call-up and traffic regulation, supported by QR-based entry verification at controlled access points.
- Transparent, auditable record of all truck movements and access events

Who This Serves

Port terminal operators · State government transport agencies · Shipping lines · Logistics and haulage companies · Truck owners and drivers

Access Control & Monitoring

TTP designs, installs, and maintains the physical technology infrastructure that enforces access discipline and provides real-time surveillance across logistics facilities.

Access Control Architecture

- Boom barriers with electronic control modules ECMs, QR scanner integration, and performance monitoring with error logging and remote diagnostics.
- CCTV surveillance networks for 24-hour visual coverage
- Radio network infrastructure for real-time communication across distributed sites

Medium to Long Term Impact

- Elimination of unauthorised access and human-discretion bottlenecks, improving security and significantly reducing cargo theft.
- Continuous operational visibility across single and multi-site facilities
- Durable audit trail supporting regulatory compliance and incident investigation

Who This Serves

Port terminal operators · FMCG and manufacturing facilities · Truck Park owners and operators · State and federal government agencies.

Truck Park & Transit Hub Development

TTP develops, upgrades, and manages truck parks and transit hubs to international standards of safety, security, and operational efficiency.

Transit Hub Architecture

- Smart, integrated and sustainable hubs that are strategically located; sound facility layout enables efficient movement of trucks & cargo.
- Ètò-enabled operations with smart access control, CCTV, and electronically networked facilities.
- Integrated driver hostel, warehouse, maintenance, refuelling, renewable energy and environmental management systems.

Medium to Long Term Impact

- Structured staging capacity that eliminates roadside parking and informal holding
- Improved driver welfare outcomes and road safety performance
- Commercially viable, self-sustaining infrastructure assets for owners and operators

Who This Serves:

Federal and state governments · Port authorities · Private Park owners and operators · Logistics and freight companies · Development finance institutions and infrastructure investors · FMCGs

Vehicle Scheduling & Transit Management System (VSTMS)

TTP's vehicle scheduling and transit management system replaces informal access with structured, data-driven coordination, providing the operational discipline layer that makes mobility infrastructure function.

VSTMS Architecture

- Electronic tagging (E-tags) and automated access control barriers
- Structured truck scheduling and loading bay allocation
- A comprehensive dashboard and analytics suite providing live operational insights, including truck turnaround time and dwell time analysis

Medium to Long Term Impact

- Improved operational efficiency and reduced truck turnaround time
- Accelerated cargo evacuation and supply chain optimisation
- End-to-end visibility of truck movements and facility performance, data management, reporting, and governance across the full operation

Who This Serves

Port terminal operators · Manufacturing and FMCG companies · Logistics and haulage companies · Trade associations

Mobility Consulting & Design

TTP's consulting practice leverages over seven years of proprietary traffic data and international benchmarks to deliver practical mobility strategies for governments, port authorities, manufacturers, and trade associations.

Consulting Architecture

- Mobility and corridor assessment using TTP's proprietary traffic dataset
- Logistics hub planning and transit infrastructure design
- Traffic management frameworks benchmarked against international best practices across Europe, Middle East, and Africa.

Medium to Long Term Impact

- Evidence-based infrastructure investment decisions that enable scalable, future-proof logistics systems designed for sustainable growth.
- Reduction in corridor congestion and freight logistics costs
- Stronger regulatory and stakeholder alignment around mobility interventions

Who This Serves

Federal and state governments · Port authorities and terminal operators · Manufacturers and FMCG companies · Trade associations and freight policy bodies · Development finance institutions

SaaS for Car & Trailer Parks

TTP's SaaS platform brings digital management capability to car parks and trailer parks, giving operators real-time visibility, automated access control, and the operational tools to run facilities efficiently without manual oversight.

Platform Architecture

- Real-time cloud-based park management with occupancy tracking and digital access control.
- Integrated booking, payment, billing, and automated entry and exit management.
- Advanced reporting and analytics covering utilisation, revenue, and truck turnaround performance.

Medium to Long Term Impact

- Significant reduction in manual management overhead and human error

- Improved revenue capture through automated payment and occupancy tracking
- Real-time operational visibility enabling proactive facility management
- Scalable platform adaptable to single-site and multi-site operations

Who This Serves

Car park operators · Trailer Park and logistics yard owners · Corporate facility managers · State government transport agencies · Private logistics operators

PROJECT IMPLEMENTATION FRAMEWORK

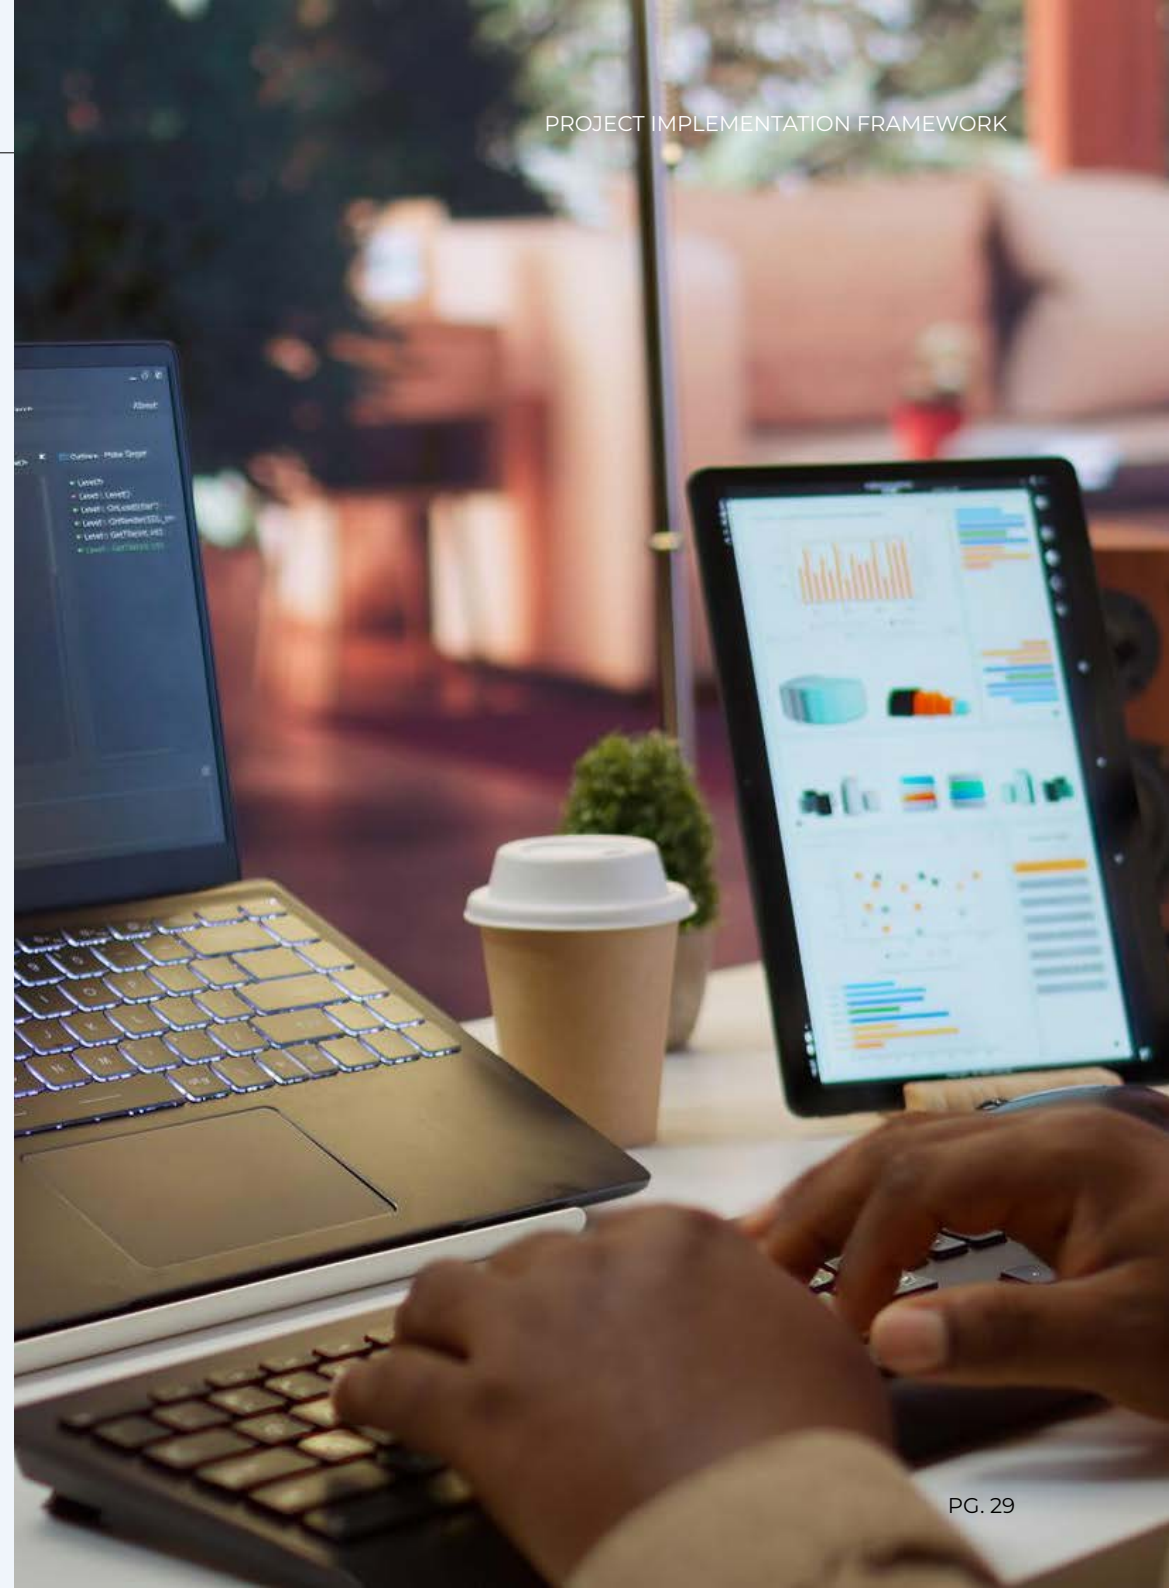

- Mobility Systems
- Logistics Infrastructure
- Digital Infrastructure
- Stakeholders management

Mobility Systems

Technology platforms and digital tools that schedule, sequence, monitor, and optimise truck movement across logistics networks.

Logistics Infrastructure

Physical assets - truck parks, transit hubs, holding bays that TTP develops, leases, and manages as the operational foundation of the freight mobility network.

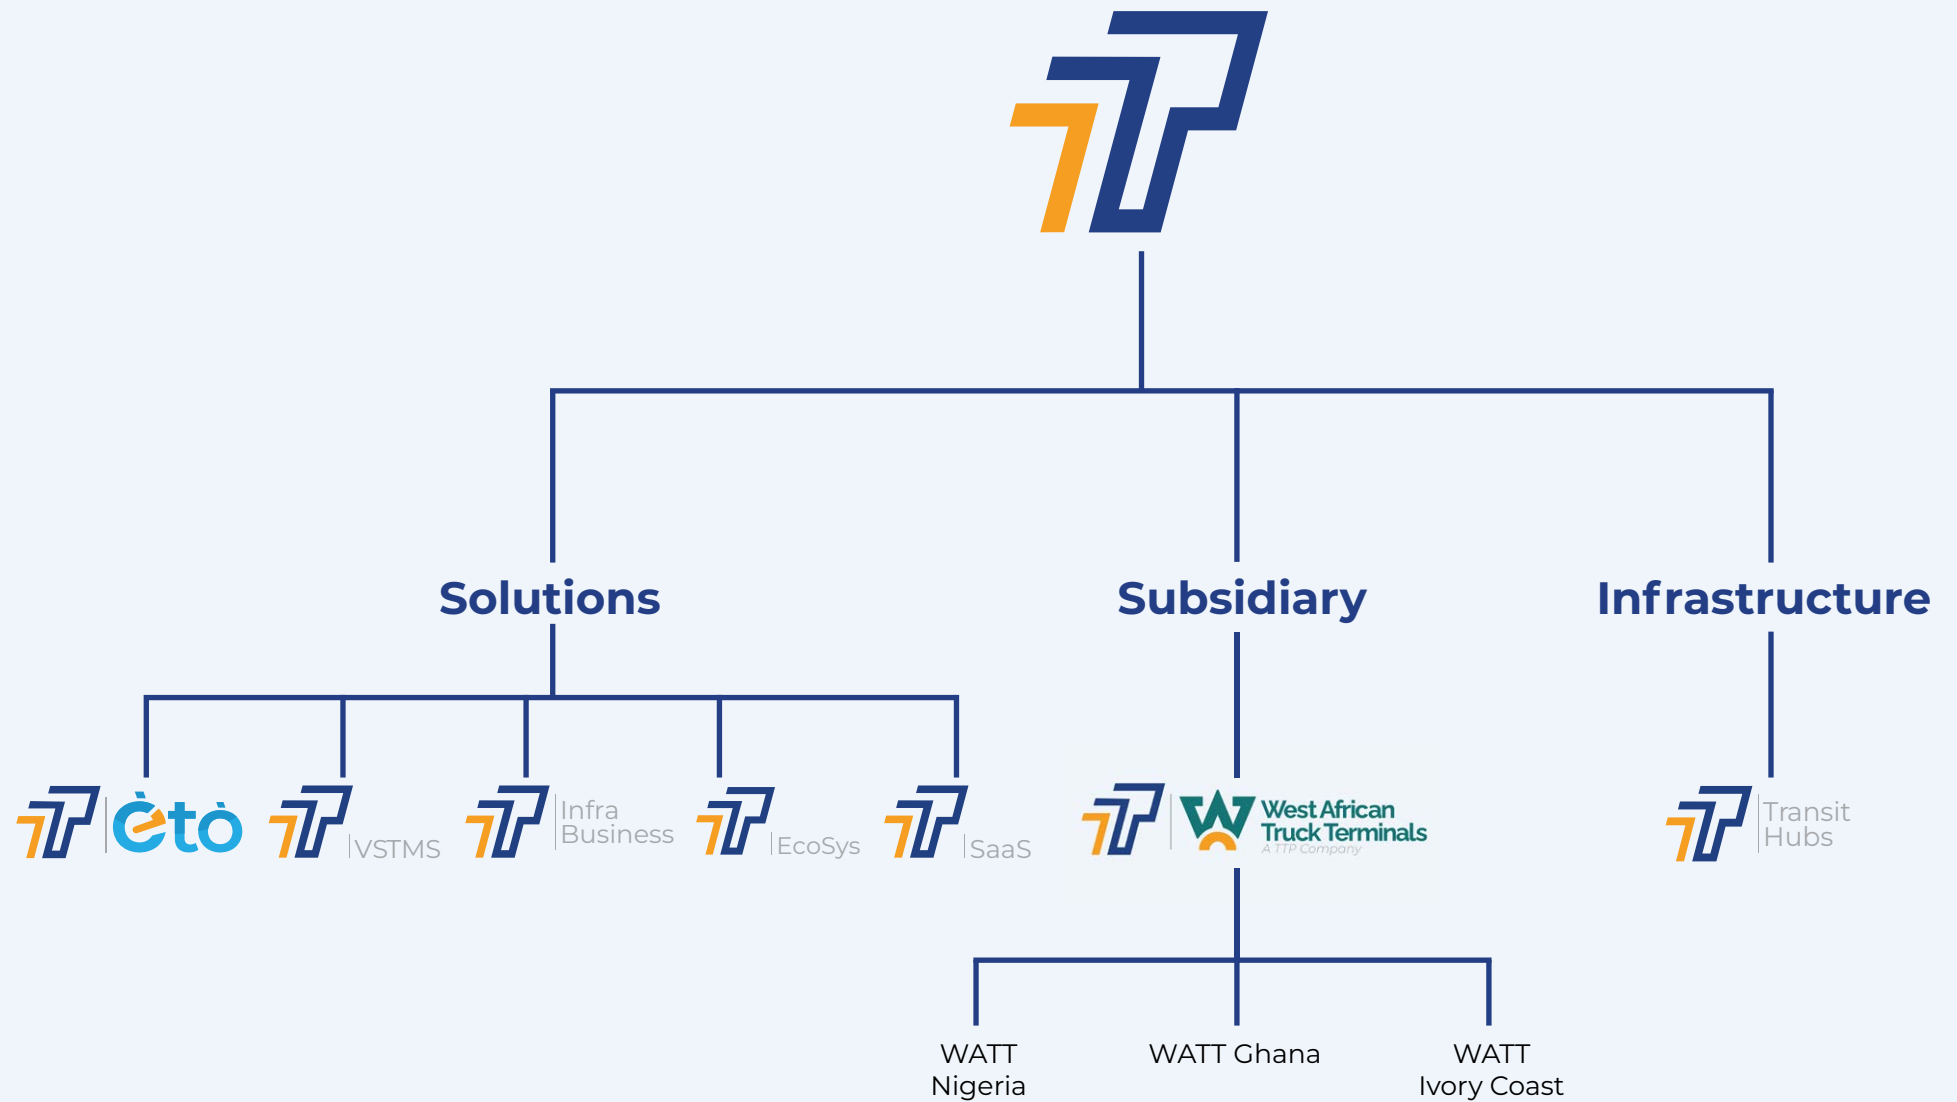

Digital Infrastructure

Physical technology assets - access barriers, CCTV, radio networks, ECMs, that enforce access control and provide surveillance across logistics facilities.

Stakeholders management

TTP's ecosystem is strengthened by strong partnerships and coordinated engagement with key stakeholders across the public and private sectors. Core stakeholders - Federal & State Governments, Ports Authority, Terminal Operators & Shipping Lines, Transport Associations & Unions, FMCGs & Logistics Fleet Companies, Host Communities, Security & Enforcement Agencies

OUR SUBSIDIARIES

- West African Truck Terminals (WATT)
 - » WATT Nigeria
 - » WATT Ghana
 - » WATT Ivory Coast

WATT

WATT is a West African logistics infrastructure and technology company focused on developing, upgrading and professionally managing vehicle transit areas, truck parks, cargo holding zones, documentation centres and border logistics facilities.

WATT works with customs, port, immigration, transport and highway agencies to bring order, visibility and compliance to truck and cargo movements through fit-for-purpose infrastructure and digital traffic management systems.
